

PROJECT PEER REVIEW

U.S. DEPARTMENT OF ENERGY
WIND ENERGY TECHNOLOGIES OFFICE
WATER POWER TECHNOLOGIES OFFICE

Feb. 14-16, 2017

Sheraton Pentagon City
Arlington, VA

The U.S. Department of Energy's Wind Energy Technologies Office (WETO) and Water Power Technologies Office (WPTO) will hold their Project Peer Reviews February 14-16, 2017, at the Sheraton Pentagon City Hotel in Arlington, Virginia. At the review, researchers will highlight progress, key accomplishments, and paths forward for projects representing the breadth of funding in WETO and WPTO's research, development, and demonstration portfolio.

Projects will be reviewed by select subject matter experts from industry, academia, and federal agencies.

Don't miss this opportunity to engage in stimulating discussions and networking opportunities related to a range of innovations, including:

- **Wind:** Technology advancements in utility-scale and distributed wind systems, environmental, grid, wind resource characterization, and modeling and analysis.
- **Water:** Wave modeling and characterizations for marine and hydrokinetic technologies, modular and emerging hydropower technologies, and biological design.
